

ABSTRACT OF THE DISCLOSURE

A kimchi refrigerator includes a cabinet to define an external appearance of the kimchi refrigerator. The cabinet includes a storage compartment to store food. The storage compartment is opened at a top thereof to form an opening. A lid is hinged to a predetermined portion of the cabinet to close the opening of the cabinet. A hinge unit hinges the lid to the predetermined portion of the cabinet. In this case, first and second cam units are included at both ends of the hinge unit to be mounted to both sides, or corners, of the lid to open or close the lid.
